PROFILE

MCA graduate with around one year of experience as a Programmer Level 2 at Chanakya Tradevistas LLP, where I developed and optimized algorithmic trading strategies using C/C++. Proficient in Python, Django, JavaScript, React, and Node.js for creating dynamic web applications. Skilled in HTML, CSS, SQL, and REST API development with a solid understanding of full-stack concepts. Currently building web projects to strengthen expertise and seeking an opportunity to grow as a web developer.

EXPERIENCE

Chanakya Tradevistas LLP
PROGRAMMER LEVEL - 2   *April/2024 – February/2025*

- Developed and implemented algorithmic trading strategies, optimized system performance, and troubleshot issues using tools like GDB and strace.
- Designed and tested user-friendly GUIs for trading strategies, enhancing functionality and usability.
- Installed and configured trading software on client servers. Collaborated with the team on strategy development and consistently delivered projects on time.

SKILLS

Technical: C Language, C++, MySQL, Python, Java, Linux, Node.js, React, HTML 5, CSS, JavaScript, Git & Github.

EDUCATION

- Late Bhausaheb Hiray College (Mumbai University) **(MCA) (7.68CGPI)** (2021-2023) (**Link**)
- Vivek College of Commerce (Mumbai University) **BSC(IT) (7.23CGPI)** (2017-2020) (**Link**)
- Sanskardham jr. College of Science (Maharashtra State Board) **HSC (57.85%)** (2014-2016) (**Link**)
- Mahatma Gandhi Vidyalaya (Maharashtra State Board) **SSC (70.00%)** (2014) (**Link**)

CERTIFICATIONS

- PROBLEM SOLVING THROUGH PROGRAMMING IN C **(79%) - NPTEL** (**Link**)
- PROGRAMMING IN MODERN C++ **(63%) - NPTEL (Link)**

ACHIEVEMENTS

- LEETCODE PROFILE (https://leetcode.com/u/Sunilkumar_kahar/)
- HACKERRANK PROFILE (https://www.hackerrank.com/profile/Sunilkumar_kahar)

PROJECTS

- **Algorithmic Trading Order Book Simulator(C++) (GitHub Link)**
  - Designed and implemented a price-priority order book to simulate exchange-style trade matching.
  - Supports order placement, cancellation, modification, and partial fills with efficient O(log n) and O(1) operations using STL containers (map, unordered_map, list).

- **MY Portfolio(React) (GitHub Link)**
  - Developed a responsive personal portfolio website to showcase projects, skills, and experience.
  - Built using React, Vite, and custom CSS for a clean and fast user experience.
  - Integrated direct links to LinkedIn, GitHub, and email for easy professional networking.
